

This clip-in, windscreen-cutting system makes cutting glass windscreens so easy that it can be done effortlessly, even when alone. The 150 mm diameter suction pads, equipped with a manual vacuum pump, guarantee a firm grip on the windscreen with a maximum traction force of 50 kg per pad.

## WINDSCREEN-CUTTING SYSTEM

- This tool is simple, compact, powerful and economical.
- Only two suction pads to handle.
- Hand-operated, clip-on system: ideal for controlling the amount of effort required.
- Compatible with polyethylene rope or square piano wire.
- Compact design for tight spaces and confined areas.

## USES

- Removing windscreens and bonded-glass surfaces from vehicles.

## COMPONENT PARTS

- One bracket with two clip-on suction pads.
- One individual clip-on suction pad.
- Spool of windscreen-cutting wire - braided - 22.5.

## USAGE
